

# RED RYNO THREE STEP PROCESS

## **Step 1** **Zero-Cost Audit**

We send one of our red-seal certified electricians to inspect and gather information about your current lighting infrastructure.

## **Step 2** **Zero-Cost Analysis**

Our business analysts work to design a business case for the specified building. Once completed, we send it to you for review and invite any questions you may have.

## **Step 3** **Custom Solution**

Once you have decided that you want to move forward with the proposed solution, our team will take on full responsibility for the installation.
